

Shaping Sustainable Cities

Building a better future for America Latina

CALL FOR PAPERS

- The call is aimed at **students and academics** with a passion for mobility and urbanism.
- Participants must be affiliated with an academic institution in Latin America.
- Participants will have **four months** to develop a model based on the theme, showing the before and after of an avenue transformed into a "complete street".
- The call begins on **9/August/2021**; and the limits are:
 - a) Registration until **31/October/2021**
 - b) Reception of works until **26/November/2021**
- Participants may use versions from PTV Vissim 6.0 onwards. The following can be used:
 - a) Academic licenses available at your institution
 - b) Commercial licenses
 - c) Probationary or temporary licenses
- **No special licenses will be issued** for the competition.

CONTEST SUBJECT

"Turn a well-known avenue in your city - or your country - into a **complete street**."

What is a **complete street**?

A street that includes pedestrians and all modes of transportation (bicyclists, motorcyclists, buses, motorists), of all ages and with all types of motor skills. One where anyone can safely, adequately and comfortably access their destination.

Building a better future for America Latina

CONTEST TERMS

- Interested parties must fill out the registration form, accepting the terms and conditions.
- Participants may receive support from their professors, or develop their model as part of a subject or thesis.
- A model may be developed individually, or by a team of up to 3 people.
- The information used **must be fictitious, or of a public nature.** The use of models with a commercial origin or developed with elements from third parties is not allowed.
- Together with the model, the participant must send a **professional report** presenting and explaining the work done.
- The information should be sent to: [info.al@ptvgroup.com.](mailto:info.al@ptvgroup.com)
