Studied physics

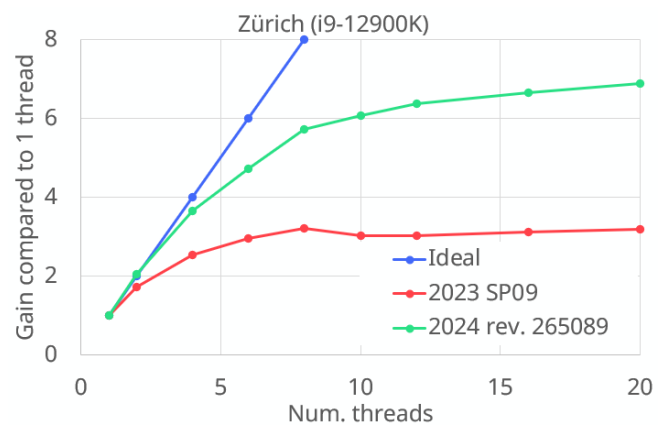

Simulated pedestrians for PhD

Since 2007 product manager for Viswalk at PTV

Presentations

What is new in Vissim/Viswalk

Presentation of the new features in Vissim and Viswalk 2024.

Vissim Hardware and cloud

Vissim has made the first steps into the cloud. This will be presented and an opportunity to discuss further needs will be given. A smaller topic will be the introduction of hybrid multi-core layout (performance and efficiency cores) by Intel and implications for Vissim simulations.

Viswalk re-engineering and next steps

We have worked a lot to overhaul the architecture of the pedestrian simulation code. Why was it done? What has been done? Which opportunities follow? And what do you like to have next as features in Viswalk?
